KV-700A

SOFT-CLOSE HARDWARE FOR HANGING SLIDING DOOR

Optimal Door Specification:

Features:

1. Single slide with bi-directional soft closing.
2. Adjustable soft-closing travel according to the door weight.
3. Maximum soft closing travel: 115mm.

Weight Capacity: 100KG
Door Thickness: Min. 30mm.
Door width: Max. 1500mm, Min 530mm.
Door Height: Max. 2400mm.
Door Height Adjustment: ±3mm with Quick Release Base
Including Screws: 6 pc's for Aluminum Track; 12 pc's for Quick Release Base

Size of the sink for assembling the quick release base on the door.

Fixing the rail:

Screw top must be lower than the fixing plane. (Correct)

Screw top must not exceed the fixing plane. (Incorrect)

Before disassembling the door:

1. Please place buffer under the gap of the door before disassembling, in order to prevent damage to the quick release base.

Aluminum Track Length = Interior Frame Width - 36mm

Actuator = 247mm

Actuator = Door Width - 260mm

The weight of the door may influence the closing performance of the soft-close kits. Adjust the positions of the two actuators to attain the desired closing results.

Note: Make sure both sides are opened before installing.

Installation Procedures:

1. Install one of the actuators
2. Insert Hanger
3. Insert Bi-Directional Soft-Close Kits
4. Install the other of actuator
5. Install the Repair Block
6. Install the Repair Block

2. Please put the wrench between the hanger and the quick release base as the picture shows.
3. Please lift up the door before disassembling.

Turn the wrench clockwise about 8 degrees to disassemble the door.
